

Session # 2 Lecture

Overview

- ✦ *NLM case review-discussion*
 - ✦ *Conversation with Ms. Williams, NLM*
- ✦ *Course logistics*
- ✦ *Discuss Challenge Question #1*
- ✦ *Discuss Challenge Question #2*
- ✦ *Discuss E-Bay in the Context of Chapter 2*
 - ✦ *E-Bay video*
- ✦ *Develop Case Analysis Framework using Amazon*

Discuss Challenge

Question #1

- *What was the goal of your transformation?*
- *What were the key areas?*
- *Where did you locate your area on McFarland's grid?*
- *What did you decide to do (move or stay put)?*
- *What technology was used for the transformation?*
- *What was the impact (five bullet points)?*
- *What was the value proposition to your stakeholders?*

Discuss Challenge Question #2

- ✦ *What process did you focus on?*
- ✦ *What Approaches to Business Model Evolution did you apply to your process?*
- ✦ *What Proposed technologies / applications did you recommend?*
- ✦ *What was the value proposition (benefits to stakeholders)?*

E-Bay / Chapter 2

- ✦ *How did E-Bay evolve their business model?*
 - ✦ *Video*
 - ✦ *Discuss Examples*
- ✦ *How did American express evolve their business model*
 - ✦ *Discuss examples*

Case Framework

- ✦ *Describe the Company, Industry and Environment*
- ✦ *Who are the Stakeholders?*
- ✦ *What are the problems / Symptoms?*
- ✦ *Who or What has the potential for causing the problems*
- ✦ *Who may be affected by the problems*
- ✦ *What are the alternative Solutions*
- ✦ *What are the pro's and Con's of each solution*
- ✦ *What is your recommendation*

Case Analysis Framework

- ✦ *Describe the Company, Industry and Environment*
- ✦ *Discuss Amazon.com*

Case Framework

- ✦ *Who are the Stakeholders?*
 - ✦ *Internal*
 - ✦ *External*
- ✦ *Discuss Amazon.com*
- ✦ *As a class list*

Case Framework

- ✦ *What are the problems / Symptoms?*
- ✦ *Discuss Amazon.com*
 - ✦ *Within your groups*
 - ✦ *List a set of potential problems for Amazon (approx. 5)*
 - ✦ *Discuss as a class*
 - ✦ *Symptoms / Problems / connection*
- ✦ *Develop a Matrix*

Case Framework

- ✦ *Who or What has the potential for causing the problems / Who may be affected by the problems?*
 - ✦ *Stakeholders*
 - ✦ *Environment*
- ✦ *Discuss Amazon.com*
- ✦ *As a Class connect to either Symptoms or Problems*

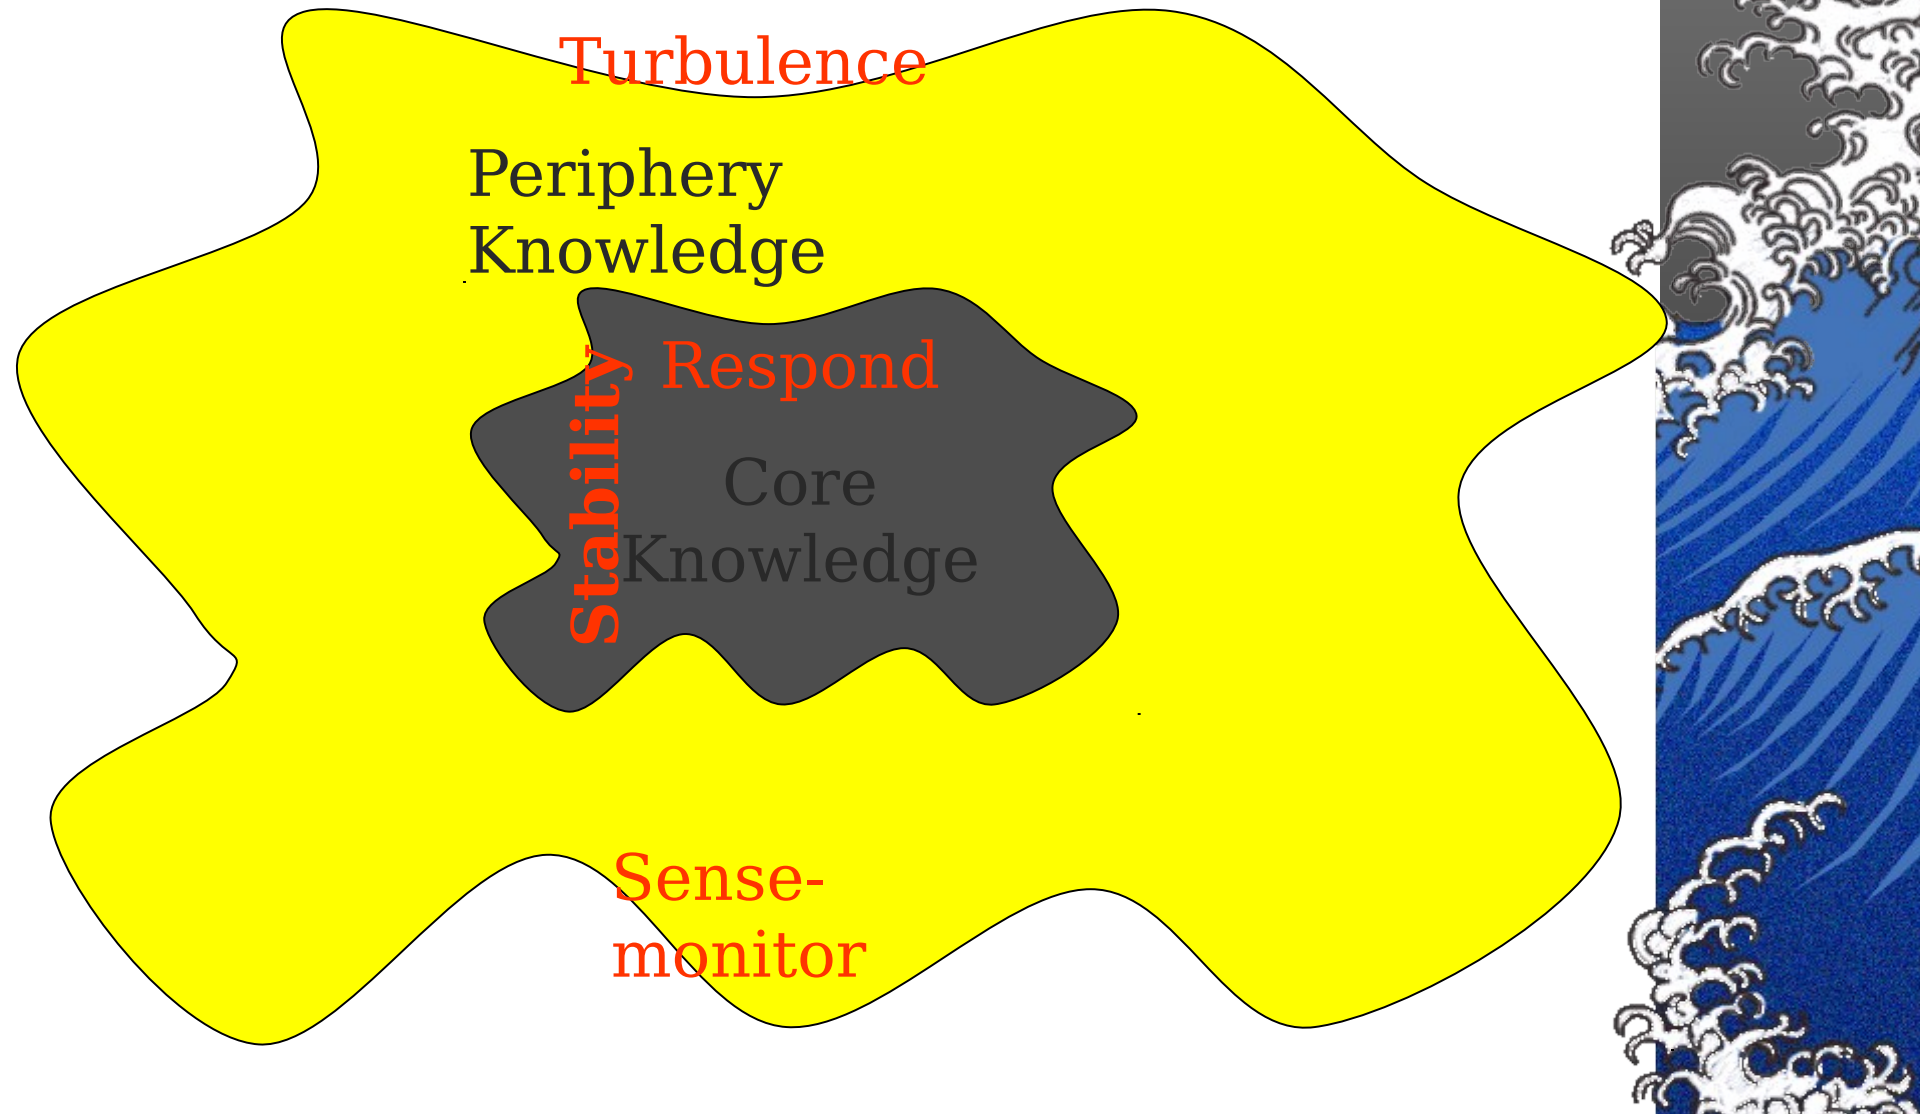

Case Framework

- ★ *What are the alternative Solutions*
- ★ *Discuss Amazon.com*
 - ★ *In your groups develop a set of solutions (3) one for each problem or one that solves more than one problem*
 - ★ *As a class / Group list all the solutions*
 - ★ *As a group list the Pro's and Cons of each solution*
 - ★ *As a class discuss the Pro's and Con's*
 - ★ *As a group determine the best solution*

Ecosystem Model of Internet Business Space

| | <u>Industrial Age</u> (mechanistic) Old Way | <u>Internet Information Age</u> (organic) New Way |
|------------------------|---|--|
| Customers | Take what they can get, mass production | <ul style="list-style-type: none"> - Customization-Individually - Electronic Bonding - Well known behavior patterns |
| Processes | Externalized-machine precision--controlled from top (Moving atoms) | External and internal--changing constantly, highly automated, flexible (Moving electrons) |
| Economics | Return on Tangible assets <ul style="list-style-type: none"> - Cost accounting - Cost only raw data | Return on intangible <ul style="list-style-type: none"> - Both cost and value - New raw data for cost/value intangibles |
| Change | <ul style="list-style-type: none"> - Predictable, controllable - Linear, Newtonian, Mechanistic | <ul style="list-style-type: none"> - Constant--unpredictable based on changing market - "Internet Time" - Thermodynamics |
| Management | <ul style="list-style-type: none"> - Command and Control - Top-down - Build step-by-step (Theory X, Scientific Mgmt) | <ul style="list-style-type: none"> - Bottoms-up - Sense and respond - Cultivate (Self-directed work teams, self-organizing, communities of practice/interest) |
| Strategy | <ul style="list-style-type: none"> - Forecasting based on historical trends and control of capital - Risk-averse | <ul style="list-style-type: none"> - Monitor and adapt - Risk as a fact of life - Never get comfortable with status quo |
| Information Technology | <ul style="list-style-type: none"> - Automate to reduce production and back office costs | <ul style="list-style-type: none"> - Information instantaneously everywhere - Connect parties to create new value(customers, sellers, suppliers) - Move K-assets out of heads into IT |

EB/EC Architecture Goals

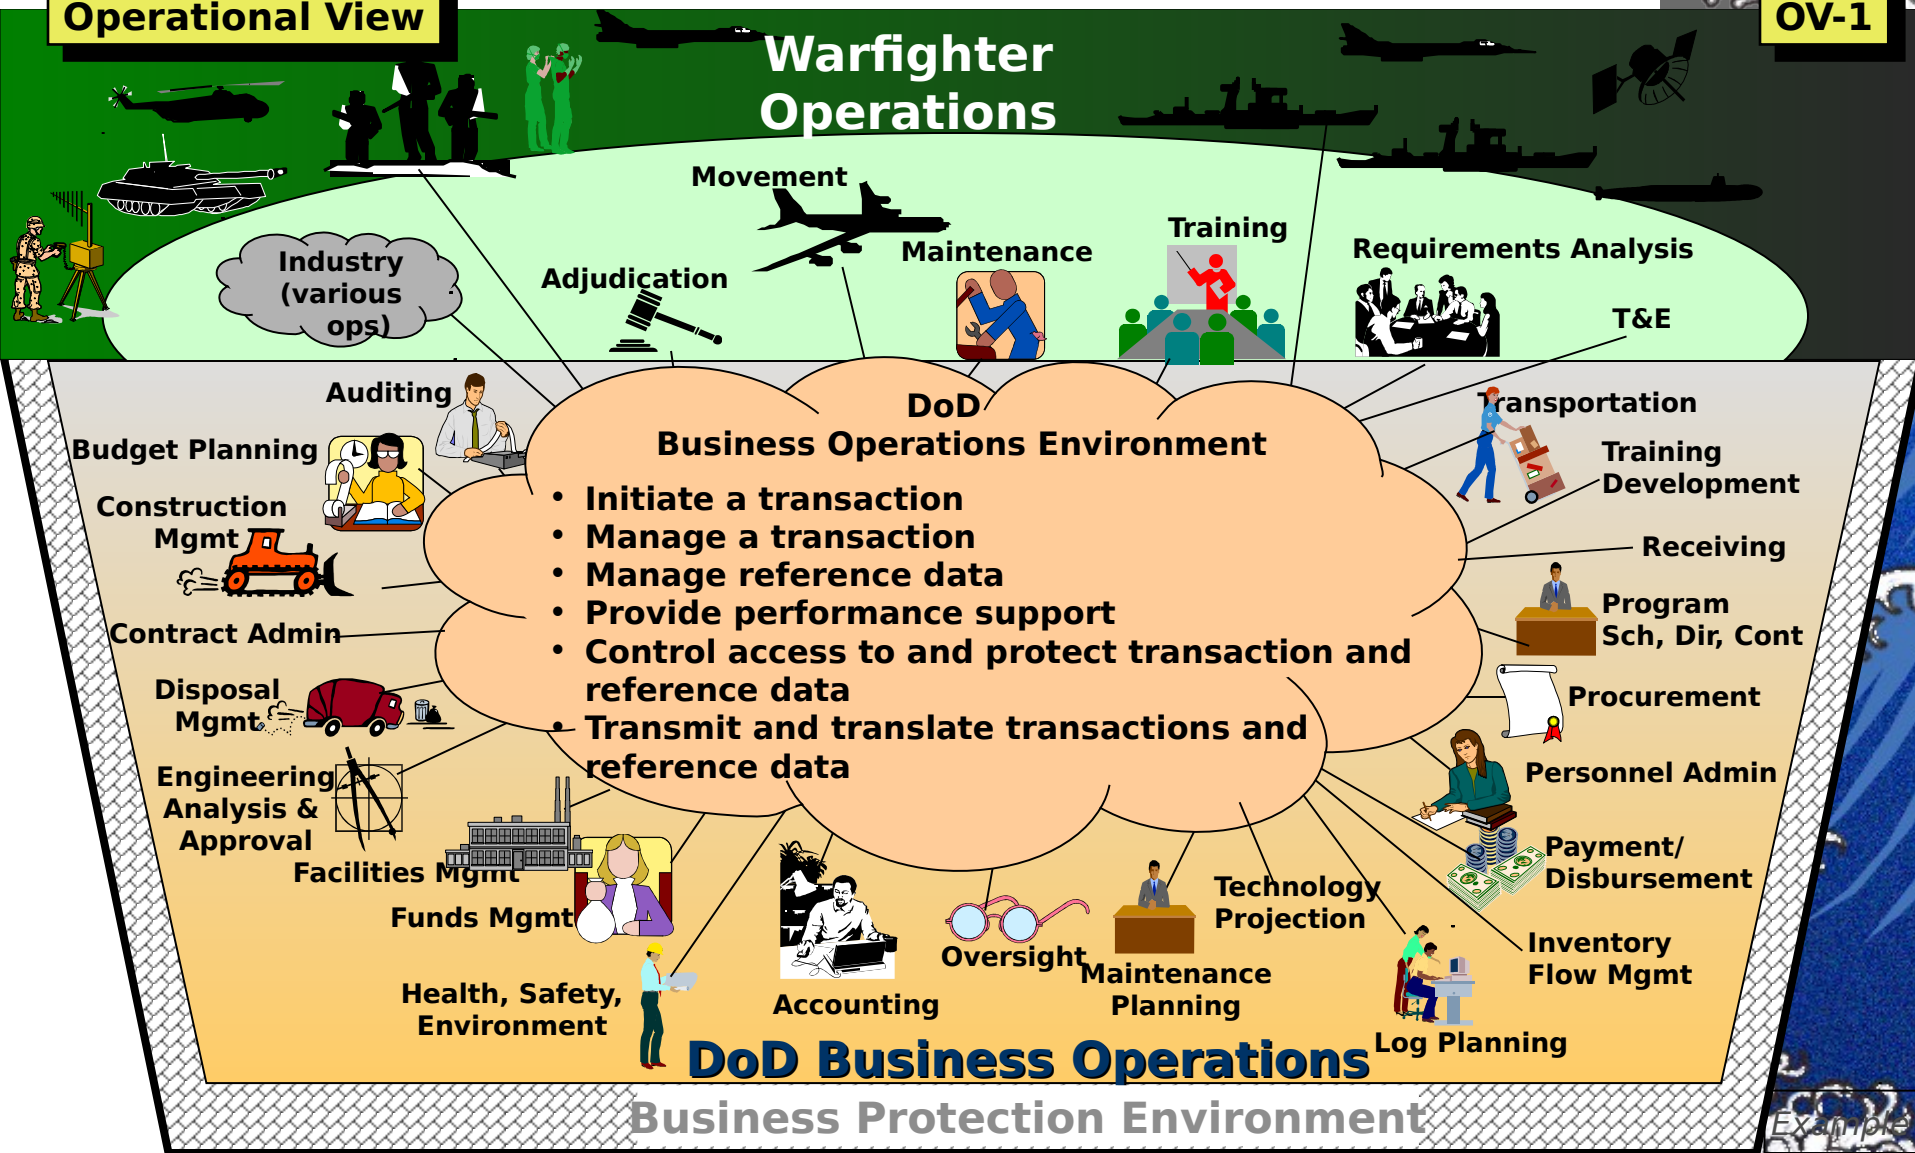

- *Provide a means for optimizing DoD business operations*
 - ▲ *Define DoD business operations and their operational environment*
 - ▲ *Define the flow of data/assets necessary to conduct business operations*
 - ▲ *Define major system components*
 - ▲ *Define flexible industry-based technology profile*
- *Provide the following (through DoD-wide adherence to Architecture):*
 - ▲ *Compatibility of business operations*
 - ▲ *Commonality of business functions*
 - ▲ *Interoperability and scalability of business systems*
 - ▲ *Efficient use of resources*

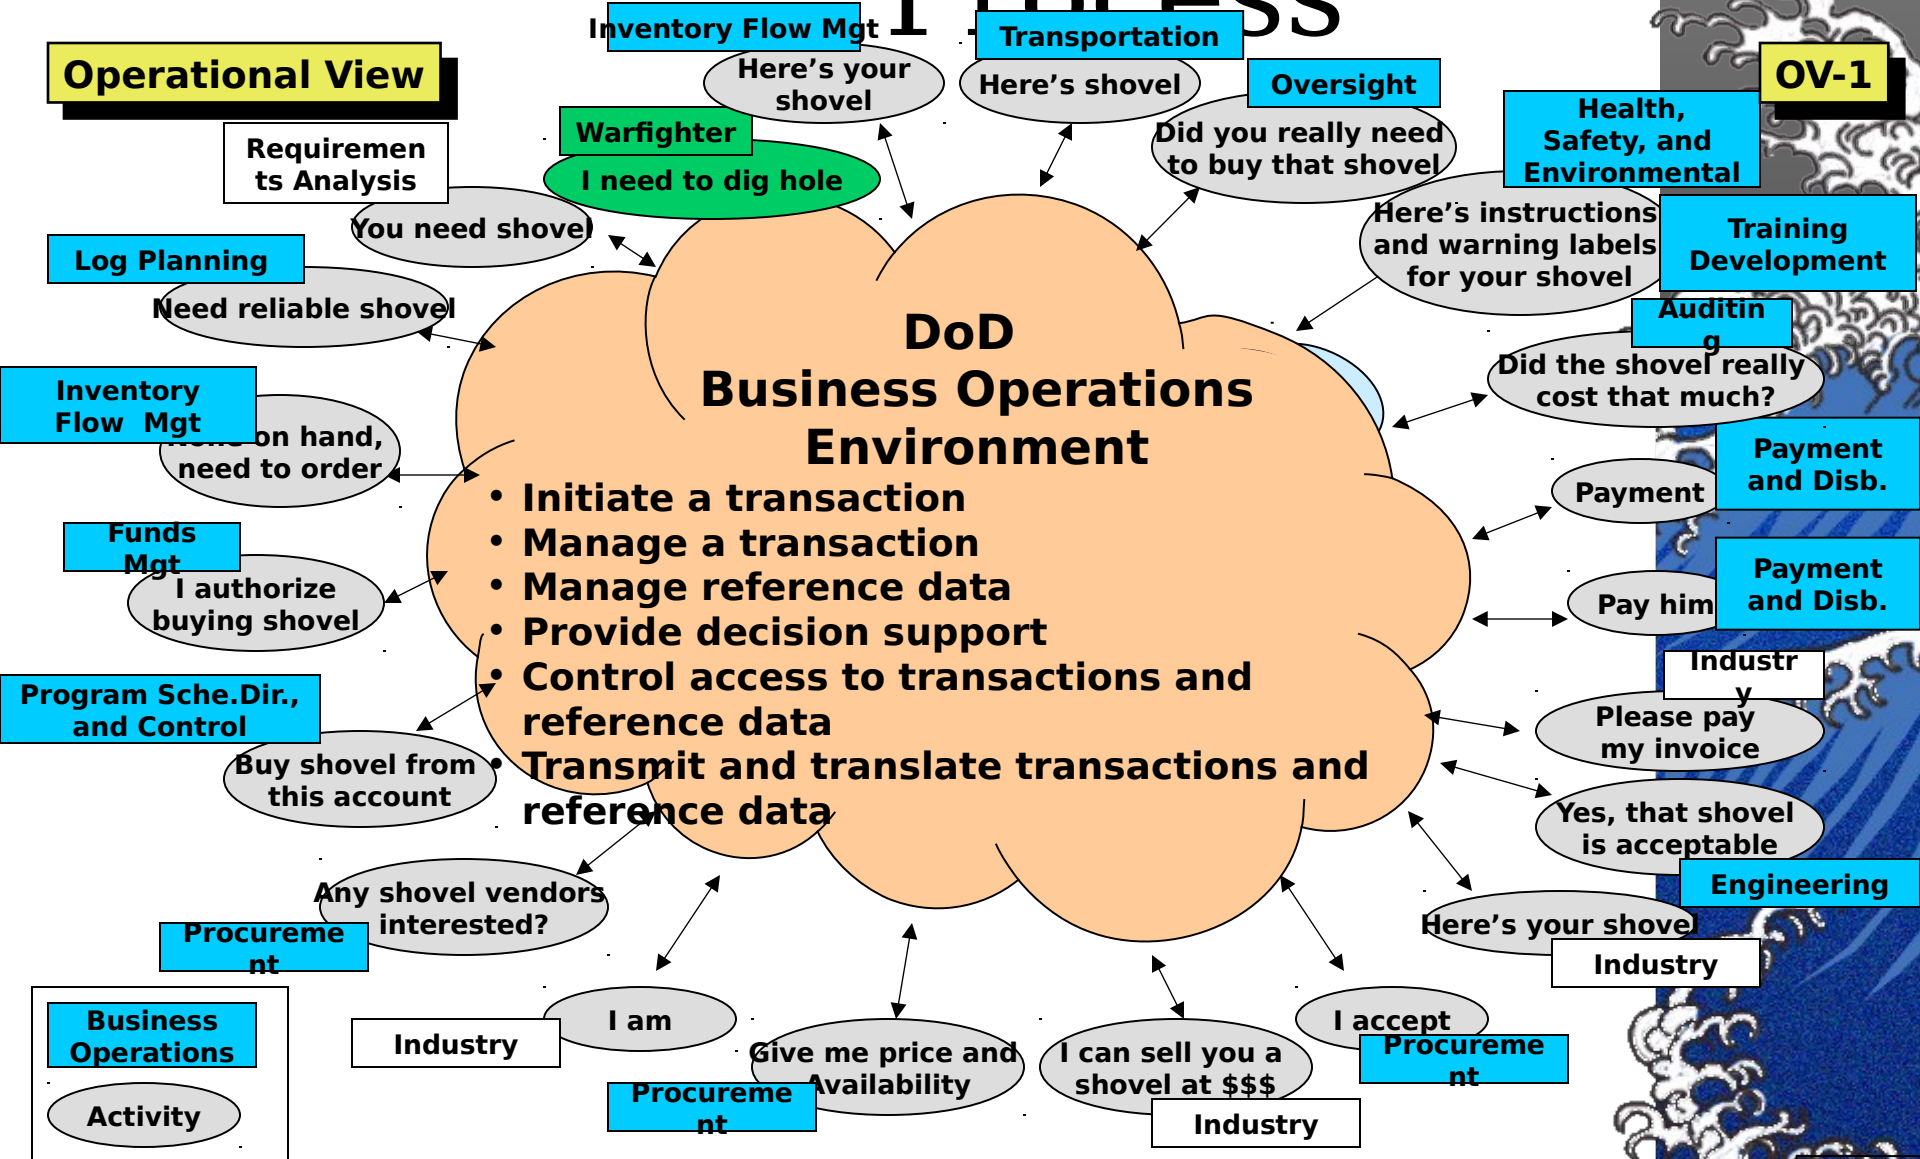

DoD EC Architecture High-Level Operational Graphic

Operational View

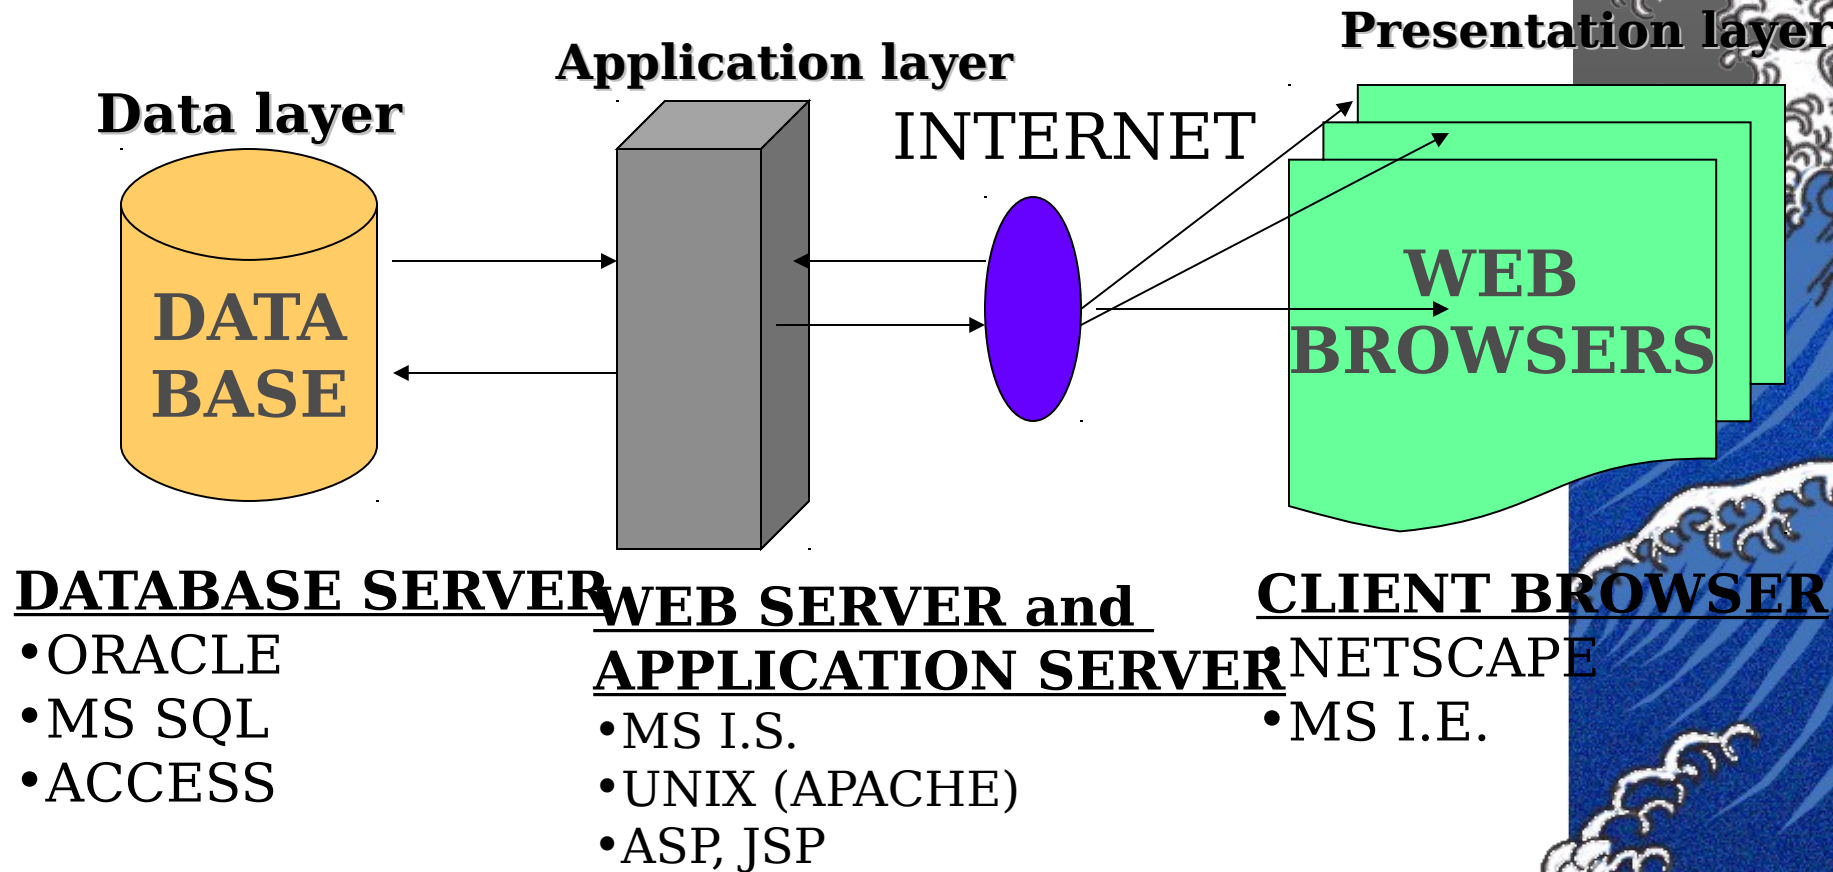

OV-1

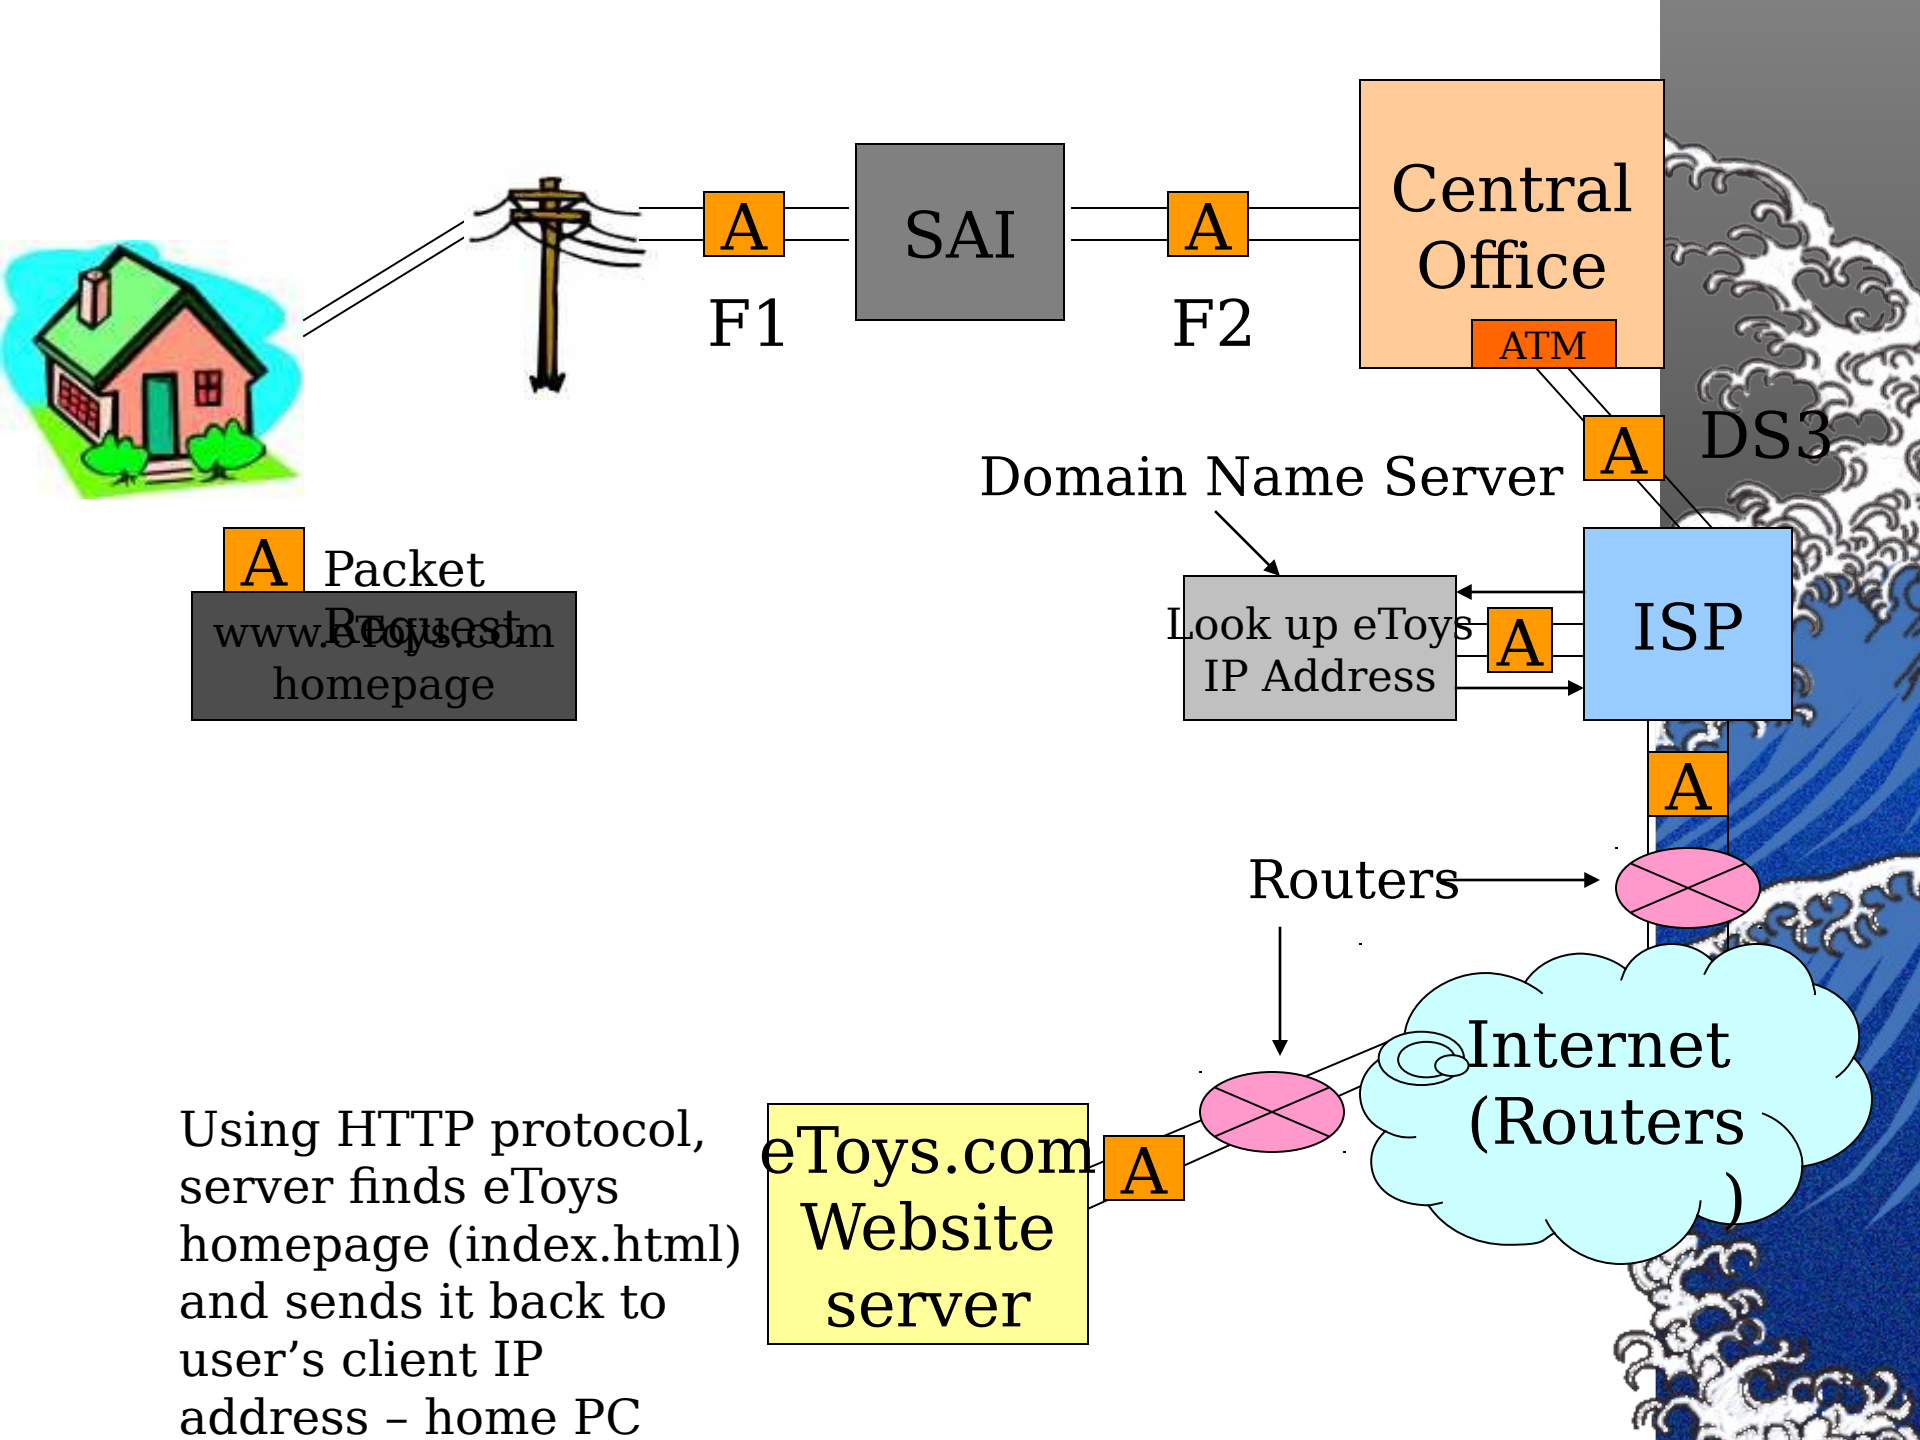

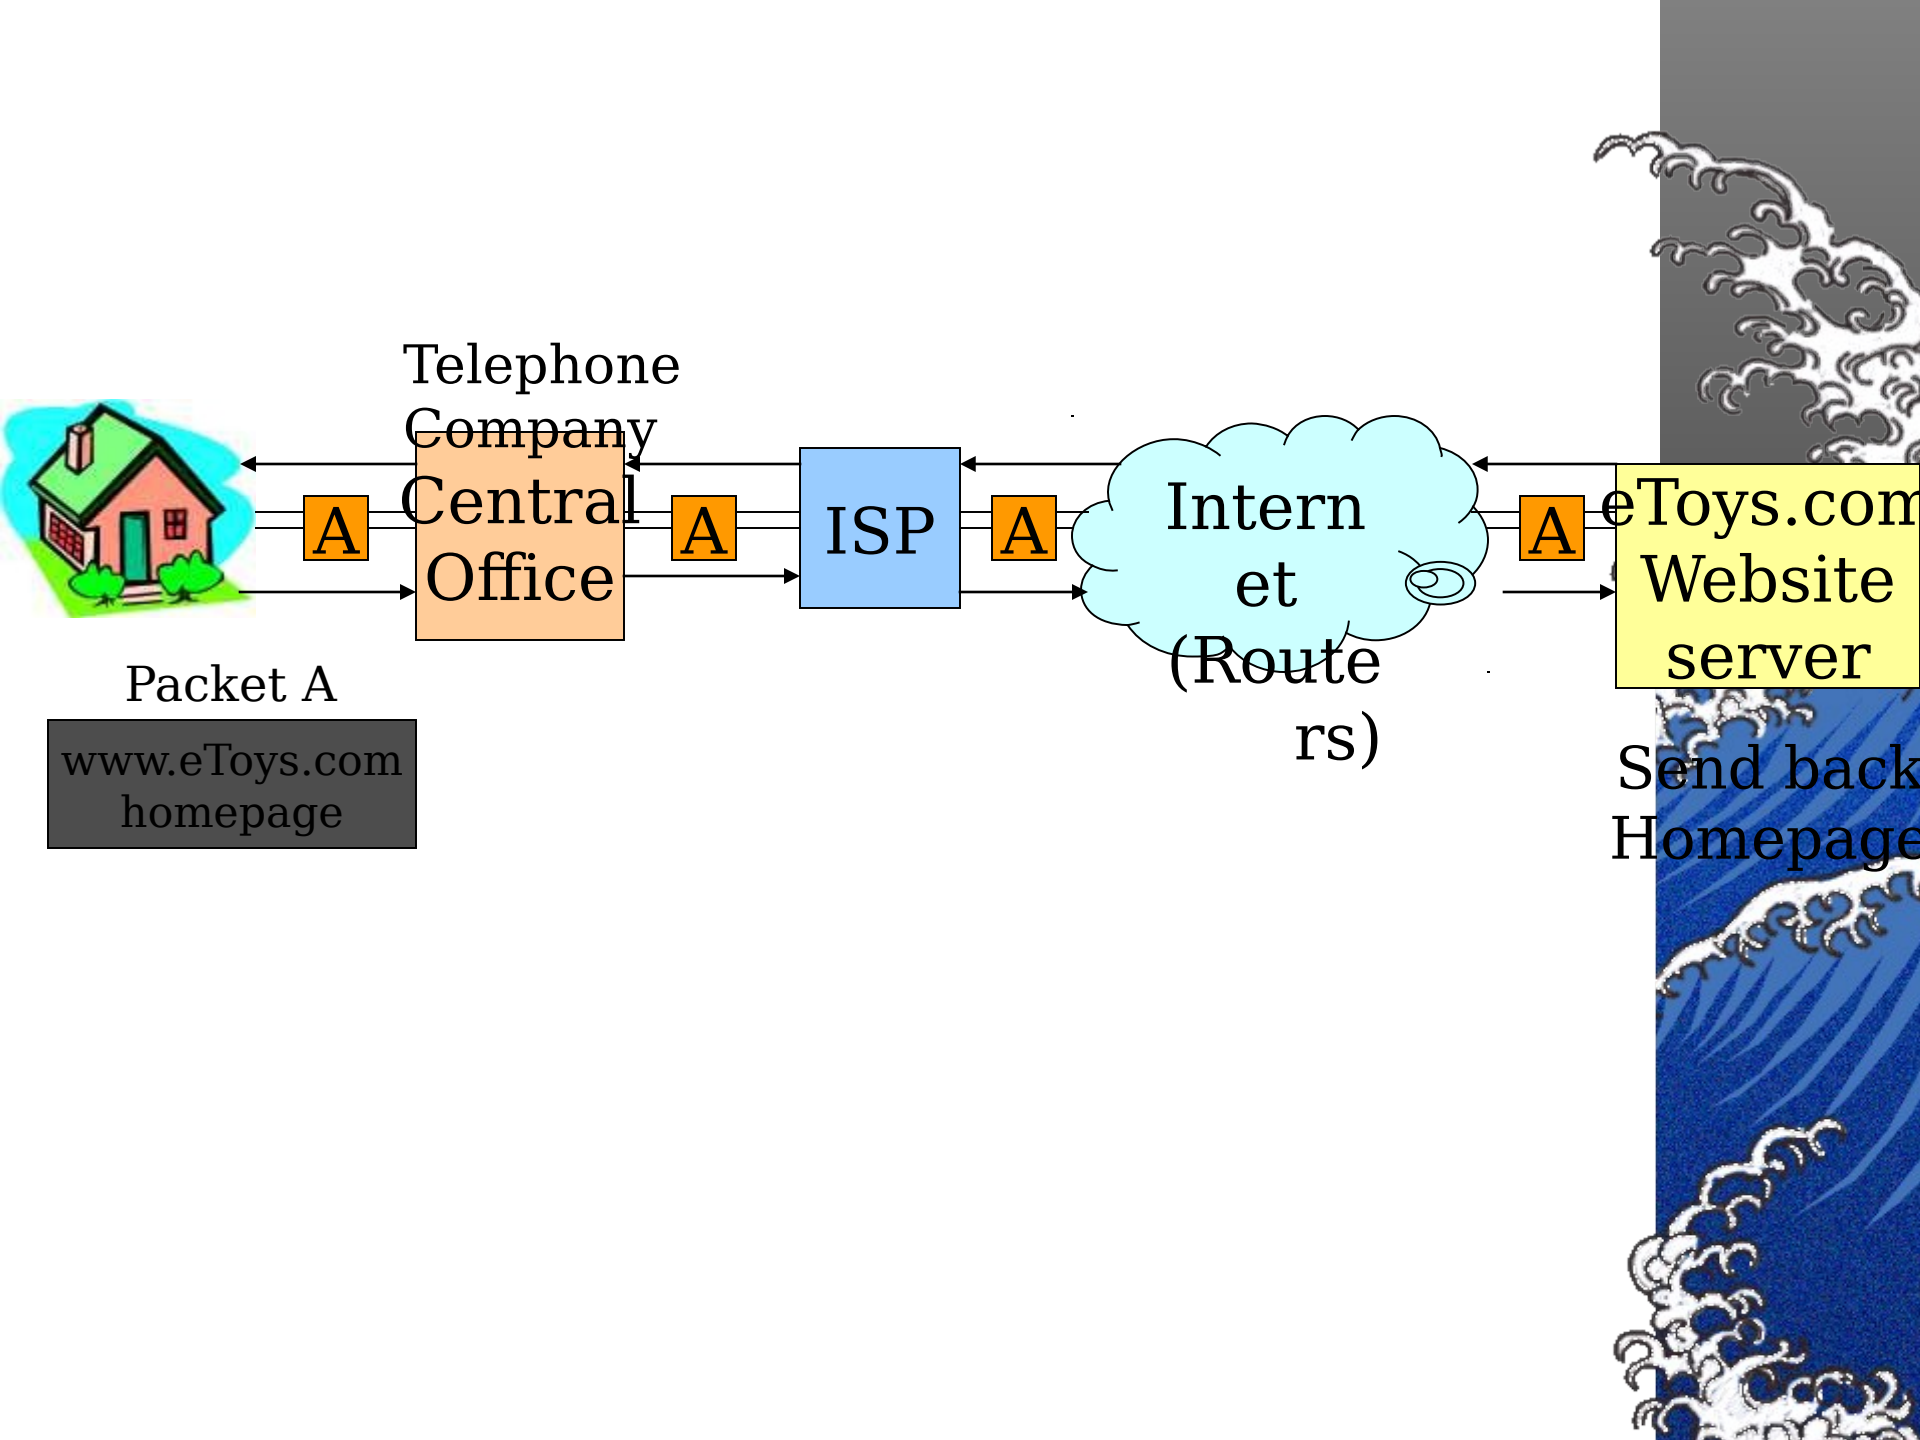

Example Business Process

Three Tier/N'Tier Model for E-Business

Sources of Change

Condition

| | <i>DoD- Top Brass</i> | <i>Presiden t</i> | <i>Congres s</i> | <i>Citize ns</i> |
|---|-------------------------------|-----------------------|----------------------|----------------------|
| <i>War</i> | <i>X</i> | | | |
| <i>Peace</i> | | | <i>X</i> | <i>X</i> |
| <i>In Betwe en (e.g.Terr orism)</i> | | <i>X</i> | | |

Conclusions

- ✦ *N-Tier architecture for applications*
- ✦ *Continued exponential growth*
- ✦ *Everything will be IP*
- ✦ *Broadband and wireless growth*
- ✦ *Acceleration of business –
government/ defense change will
continue unabated*
